

# HARP Body Scan Solutions

## Body Temperature Scanning

### Solution Includes

- Thermal Built Camera
- 32" HD LCD Screen
- Image Processing PC
- Network Hub with POE
- Installation including: - cabling and wall/ceiling plate

### Entry Level Solution

Harp's Thermal Screening Camera solutions detect elevated skin-surface temperature with high accuracy in real time, +/- 0.5°C, with the capability to discover and track people with high body temperature even among crowded public areas.

Great for preliminary temperature screening in office buildings, factories, stations, airports, customs, schools, building sites and other public places.

### Features

- 160 x 120 resolution in thermal camera
- Temperature range: 30°C to 45°C
- Temperature accuracy: ± 0.5 °C
- Automated Audio Alarm
- 32" HD 16/7 LCD Display
- Image Processing PC
- All inclusive Price £ 5,389.00 + VAT
